## Why FLAT CAT?

Did you know that from 5 feet, if your putter grip is open just 2 degrees, you'll miss the putt?

**The FLAT CAT™** is a game-changing new putter grip that puts the feeling of “SQUARE” in the palm of your hands.

Ensuring your putter face is square to your intended target line is the key to making putts. FLAT CAT™ Golf's patent-pending Flat1™ design enables every golfer to square their hands, square their shoulders and square their putter face to the intended target line.

*FLAT CAT's design creates a seamless connection between you and the face of your putter. This connection is obvious the first time you hit a putt and is a true game-changer. Just like other definitive technological advances in golf equipment, FLAT CAT™ grips will become dominant putter grip for anyone serious about the game of golf. If you don't put a FLAT CAT™ grip on your putter right away, you must not want to shoot lower scores.*

# SPIDER DIVOT TOOL

A better repair tool? As incredible as it seems, this is an entirely new approach to green repair.

## YOU WILL NOT BELIEVE THE RESULTS!

- Better for greens
- Marks are always properly repaired
- No sharp ends or dirt in your pocket
- Amazing results with no skill
- Unique design
- Magnetic ball marker
- Milled Aluminum Built to Last a lifetime
- Makes a great gift for your next tournament

A better repair tool? As incredible as it seems, this is an entirely new approach to green repair. It is a simple push/pull action that makes ball mark repairs easier, quicker and better. With the Spider Divot Tool, you simply remove the protective cap, insert the metal legs into the ball mark and pull upward with a twist. The patented technology of the spider easily pulls the damaged area flush with the putting surface. Tamp it and you're done! Better for the golfer and better for the golf course!

The spider is a revolutionary approach to repairing greens. It is a simple design that is so effective it requires no skill whatsoever. Push it in, twist a bit while pulling, and the result is a perfectly repaired mark. The design of the Spider keeps the dirt out of your pocket without any damage to your clothing from sharp points. The spider also provides a convenient magnetic ball marker with a recess in the casing that can be used around the green to keep grips off the ground. The Spider is uniquely effective and great for the greens.

# PRO RELEASE GRIPS

## GEN 3

The Pro Release™ reverse taper design is thinner at the top with a gradual thickening for the bottom hand.

## TECHNOLOGY YOU CAN FEEL

The Pro Release™ reverse taper design is thinner at the top with a gradual thickening for the bottom hand. This creates a more natural feel in your hands - similar to the tapered handle of a baseball bat - which allows you to easily grip (not hold) the club with your fingertips - just like the Pros

The 3rd generation Pro Release™ grips are made from a special polyurethane elastomeric compound versus natural rubber, which provides a much softer and better feel for player feedback. The grip is a two-piece design, similar to a leather wrap grip; and the grips are more tackier providing a better non-slip all-weather performance.

# PRO RELEASE GRIPS

## GEN 3

The Pro Release™ reverse taper design is thinner at the top with a gradual thickening for the bottom hand.

The Pro Release™ grip is designed to provide improved performance for the low & mid handicap and to prevent the better player from "getting stuck" while creating a more powerful release at impact. With the grip's smaller diameter, the grip is carried in the fingers as most good players do and not in the palm, which restricts the release causing loss of distance and control. The Pro Release also provides additional benefits for players that cannot grip a traditional size grip due to joint afflictions, such as arthritis as well as for players with smaller hands, such as ladies and juniors.

Of those surveyed, there were many features and benefits of the Pro Release that golfers liked. Some said the grip increased their distance by an average of 9 yards; the grip also improved their feel for chipping and their short game; and players felt more in control when swinging their driver using the grip.

Of the Pro Release grip users surveyed, 83% said it improved their total game, 71% said it reduced or eliminated their slice, 51% said their wedge play was much improved, and 29% said they now draw the ball instead of slicing it.

These new game improvement grips allow golfers to fully release the club and generate maximum club head speed through impact.

Feel Grips are USGA and R&A Conforming and fit standard golf shafts

### What Improvements Can You Expect?\*

HANDICAP	0-5	6-11	12-17	18-25
Increase in driver swing speed	+4.5 km/h	+7 km/h	+22 km/h	+28 km/h
Increase in distance on drives	+6 MTRS	+9 MTRS	+12 MTRS	+16 MTRS
Increase in distance on 7 - Iron	+3 MTRS	+6 MTRS	+8 MTRS	+10 MTRS
Shot dispersion % reduction	6%	9%	12%	18%

*\*Based on test golfer of various skill levels and feedback from our customers. Individual results may vary*

The 3rd generation Pro Release™ grips are made from a special polyurethane elastomeric compound versus natural rubber, which provides a much softer and better feel for player feedback. The grip is a two-piece design, similar to a leather wrap grip; and the grips are more tackier providing a better non-slip all-weather performance.

Some of the key features and benefits of the Pro Release grip are:

- Immediate increase in distance
- Grip design provides faster release, more control and accuracy.
- Power generating release at impact for players who carry the club deep in the slot
- Smaller diameter in the top hand allows the grip to fit in your fingers, not your palm thereby reducing distance robbing tension
- Shaft end of grip is thinner, providing flexibility to build up the shaft with grip tape and match each individual's unique grip preference

# MAGNETIC HAT CLIP BALL MARKERS

The magnetized ball marker is attached to the metal clip via a strong magnet.

The metal clip slides easily onto any hat or belt while carrying the ball marker for easier reach.
